

ApolloDMDS v1x Specifications

ApolloDMDS v1x is an embedded PC solution utilizing a proprietary Motherboard, Operating System, and Software. As a result, ApolloDMDS v1x is not exposed to viruses or software conflicts that typically plague PC based solutions utilizing external video boards and Windows or Linux based operating systems. Primary control of ApolloDMDS occurs via a web-based Graphical User Interface (GUI). Local control is available via a wireless IR remote control as well as via the GUI. The solution is designed to run cool and have a long life in the field with minimal maintenance. Operation downtime is negligible.

Quick Feature List:

- **Video:**
High Quality MPEG 2; 4:3 Aspect Ratio; NTSC
- **Audio Out:**
